MINECRAFT

PLAYDATE

Thursday, June 2, 2016 10 a.m. - 12 p.m.

Minecraft is an immensely popular game that draws strong interest from patrons of all ages.

Setting up a Minecraft server is simple enough – but do you know the game well enough to run your own program?

In this hands-on workshop, participants will get to learn Minecraft by playing it together on a MinecraftEDU server under the guidance of teen librarian, Stacey Sansone. In a relaxed environment designed for Minecraft newbies, we'll cover:

- What Minecraft is, why it's important and what the technical requirements are.
- Basic gameplay and game mechanics in simple terminology.
- The difference between student and admin level access.
- How "teacher mode" works and an outline of more advanced modules.

Location:

The Technology Center at the Mastic Recreation Center (15 Herkimer Street, Mastic, 11950).

Registration:

Register online at <http://scla.net/cats>
Each participant will have access to a computer in the lab, so space is limited!

Payment:

Program is **free** for CATS members;
\$5 for non-members, due at program check-in.
Cash or check made payable to "NYLA." with "CATS program" in the memo field.

Questions: Steve Burg (631) 399-1511 (x372)
